

I _____ hereby acknowledge and understand that even with the best training, skill and experience, a medically trained professional is not always capable of solving my medical problems. Therefore, I understand that it is important that any and all recommendations by doctors are followed completely in order to increase the likelihood of a positive and healthy treatment/outcome. I acknowledge and understand that if any physician in this office prescribes medicine to me that the proper taking of any such medicine shall be my sole responsibility (or my guardian who has attended this consultation). I agree to properly follow the prescribed dosage and frequency amounts of these medicines as recommended by my doctor.

I understand that if a doctor in this office refers me to see another doctor or receive another test including, but not limited to, a blood test, an MRI, or CT scan, this timely recommendation is important and essential to the ultimate success of my treatment/outcome. I understand that it is not possible for any person in this office to constantly follow-up to ensure that I have followed these recommendations. Therefore, I understand that if I fail to see that specialist or obtain the test for which I was referred immediately, this can risk my current health or increase future health risks.

I understand that it is solely my responsibility to follow any of the medical advice given by any medical person in this office and any bad health outcome from my failure to follow the advice of my doctors should be expected.
